

# SZÁSZ BARNÁ

FRONT-END DEVELOPER

## EXPERIENCE

### THRIFTSTUDIO

**Link:** <https://github.com/waikoo/thrifty>

**Live:** <https://monumental-zuccutto-62f1b9.netlify.app>

Collaborated with a designer to build a responsive, desktop-first online thrift store. Features include an admin dashboard for uploading, editing and managing products and a user-friendly interface equipped with advanced filtering features like saving personalized filters and recommendations for products to reach free shipping. Implemented comprehensive unit and E2E testing using Jest and Playwright to ensure optimal functionality and user experience.

**Tech stack:** Next.js, TypeScript, Tailwind, Supabase

### ROCK, PAPER, SCISSORS

**Link:** <https://github.com/waikoo/rock-paper-scissors>

**Live:** <https://waikoo.github.io/rock-paper-scissors/>

Collaborated with a designer to create a desktop-only browser game as part of the Odin Project. Implemented a round-based game structure using object-oriented programming while maintaining clear and concise function naming.

**Tech stack:** HTML, SCSS, JavaScript

### GUESS MY NUMBER

**Link:** <https://github.com/waikoo/guess-my-number>

Developed a number guessing game for the Linux CLI. Employed object-oriented programming for both the game logic and a custom-built ASCII art generator.

**Tech stack:** TypeScript, Node

### FORMAT COLORS

**Link:** <https://github.com/waikoo/FormatColors>

Developed a Chrome extension (for Frontend Mentor) to streamline CSS variable naming during web development challenges. This tool automatically converts color values received from platforms like Frontend Mentor into well-defined, human-readable variable names (e.g., \$Alabaster instead of Almost White).

**Tech stack:** HTML, SCSS, JavaScript

## EDUCATION

### Film, Photography and Media Studies

2011 - 2014 Sapientia Hungarian University of Transylvania

### The Front-End Developer Career Path Certificate

2022 Scrimba

### CSS for JavaScript Developers Certificate

2024 Josh Comeau

I'm a front-end developer focused on building user-friendly, visually appealing interfaces with HTML, CSS, JavaScript, React, Svelte, Astro, and the Linux CLI. I'm eager to expand my skills, particularly in animations, back-end development, performance optimization, and Lua programming for NeoVim plugins and Arch Linux. Looking for opportunities to apply and expand development skills in a professional environment.
