SZÁSZ EVELIN

UI / UX DESIGNER

EXPERIENCE

QUIZZICAL

Collaborated with a web developer to design a **browser-based trivia game with a responsive design**. The design process included the definition of the information architecture, user flow, wireframes, high-fidelity prototypes and style guide.

THRIFTSTUDIO

Partnered with a web developer to **design a responsive e-commerce website** for a fictional thrift store as part of the Google UX Design course. **Led the UI/UX process**, covering user research, competitive analysis, user journey map, user flow, storyboards, information architecture, wireframing, and prototyping. Conducted usability testing to refine the user experience and **developed branding elements**—including a logo, color palette, iconography, illustrations, and typography—for a cohesive visual identity. A key feature is an intuitive admin interface, enabling efficient inventory management for the thrift store.

ROCK, PAPER, SCISSORS

Collaborated with a web developer to design a **desktop—only browser game**. Developed the game's **visual identity**, including the logo, color palette, typography, and game elements, to create a cohesive atmosphere. Crafted user flow and interactions to ensure a seamless and engaging experience, focusing on simplicity and user enjoyment.
